

1.1 Introduction

Hotel Management System ek web-based application hai jo hotels ke daily operations ko manage karta hai. MERN stack ka use karke is system ko scalable aur efficient banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Hotel Management System ek web-based application hai jo hotels ke daily operations ko manage karta hai. MERN stack ka use karke is system ko scalable aur efficient banaya gaya hai. Hotel Management System ek web-based application hai jo hotels ke daily operations ko manage karta hai. MERN stack ka use karke is system ko scalable aur efficient banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.2 Existing System

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Existing system me manual booking aur record keeping hoti thi jisme errors aur data loss ka risk zyada hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.3 Problems in Existing System

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Manual system me time consumption, human errors, aur security issues sabse bade problems hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.4 Proposed System

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Proposed system digital hai jisme users online booking kar sakte hain aur admin sab data manage kar sakta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.5 Objectives

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.5 Objectives

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka objective hai booking process ko automate karna, data secure rakhna aur user experience improve karna. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.6 Features

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.6 Features

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System me features hain: online booking, payment integration, admin dashboard, room management. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.7 Security (JWT)

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

1.7 Security (JWT)

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

JWT authentication ka use karke secure login system banaya gaya hai jisme token-based validation hoti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.1 Literature Review

Different research papers aur systems ka study kiya gaya jisse system design improve ho sake. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Different research papers aur systems ka study kiya gaya jisse system design improve ho sake. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Different research papers aur systems ka study kiya gaya jisse system design improve ho sake. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Different research papers aur systems ka study kiya gaya jisse system design improve ho sake. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Different research papers aur systems ka study kiya gaya jisse system design improve ho sake. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.2 Architecture

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.2 Architecture

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System MERN architecture follow karta hai jisme frontend React, backend Node/Express aur database MongoDB hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.3 Modules

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.3 Modules

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System modules me user module, admin module, booking module aur payment module शामिल hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.4 Tech Stack

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.4 Tech Stack

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB, Express.js, React.js, Node.js, Tailwind CSS aur JWT authentication ka use kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.5 Scope

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

2.5 Scope

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ka scope hotels ke operations ko digital banana aur scalability provide karna hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.1 Database Design

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.1 Database Design

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

MongoDB me collections banaye gaye hain jaise users, bookings, rooms, payments. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.2 API Design

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.2 API Design

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

REST APIs banayi gayi hain jisse frontend aur backend communicate karte hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.3 Auth Flow

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.3 Auth Flow

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

User login ke baad JWT token generate hota hai jo har request ke sath verify hota hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.4 UI Design

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.4 UI Design

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

React aur Tailwind CSS ka use karke responsive UI design banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.5 DFD

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

3.5 DFD

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Data Flow Diagram system ke data movement ko represent karta hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.1 Backend

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.1 Backend

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Backend Node.js aur Express.js me develop kiya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.2 Frontend

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.2 Frontend

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Frontend React.js me develop kiya gaya hai jisme components use kiye gaye hain. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.3 Security

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.3 Security

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Password hashing aur JWT ka use karke system secure banaya gaya hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.4 Testing

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

4.4 Testing

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

System ko test kiya gaya hai different test cases ke sath jaise login, booking aur payment. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

5 Future Scope

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 1, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.

5 Future Scope

Future me AI-based recommendation aur mobile app add ki ja sakti hai. Is paragraph me additional explanation diya gaya hai part 2, jisse concept aur clear hota hai. System real-world scenarios ko dhyan me rakhkar design kiya gaya hai.
